C-Professional Information

1. Course Teaching:

Topics deciding edugate	No. of hrs		Tutorial/ Practical	Lecturer
 Introduction to Basics and definitions and terminologies associated with automatic control theory. Various types of automatic control loops in mechanical power and energy transfer systems. Essential requirements of accuracy, efficiency, safety, and stability of automatic control systems Concepts of mathematical modelling of various mechanical power systems and energy transfer processes The element and the whole system transfer functions, and Block diagram analysis method. Laplace Transform & inverse Laplace technique to solve the system's ordinary time-dependent differential equations. Instantaneous dynamic response of control system and its graphical presentation on an output-time scale for various types of different input testing functions. Main definitions and control characteristics of dynamic response of 1st and 2nd order automatic control systems. The analogy between various types of mechanical control systems and electric control systems. Practical applications of automatic control theory in different mechanical power and heat and mass transfer equipments. 	36 hrs	3 hrs/ week for 12 weeks before the final term exam		Associate Professor Dr. Mohsen S. Soliman & Assistance Professor Dr. Amro Abdel- Raouf
• Topics taught as a percentage of the content specified:	□>90 <i>9</i>	% √7	70-90%	□<70%

- Reasons in detail for not teaching any topic:
- Reducing the number of weeks/ Semester for many social and political reasons.
- Many mandatory vacations as per requirements of the university management. The term is only 12 weeks.
- If any topics were taught which are not specified, give reasons in detail:

- 6. Administrative Constraints: Reducing the number of the weeks per semester
- List any difficulties encountered:
- Reducing the number of weeks/ Semester for many social and political reasons
- Many mandatory vacations as per requirements of the university management. The term is only 12 weeks.

7. Comments from external evaluator(s):	Response of Course Team
Not available in writing for instructors to respond to	None
8. Comments from Students:	Response of Course Team
Done but not available in writing for instructors to respond to	None
9. Course Enhancement:	

Progress on actions identified in the previous year's action plan:

Action	State whether or not completed and give reasons for any non-completion
Upgrading Teaching facilities Supply visual aids for the classrooms Maintenance of classrooms	Not completed due to administrative problems
10 Action Plan for Academic Year 2014 – 2015	

100 Heddon I tam for Headenine Tear 2011	2010		
Actions Required	Completion Date		Person Responsible
Upgrading Teaching facilities Supply visual aids Maintenance of classrooms Incorporate more practical materials & measurement experimental labs in the course Make a Mat lab programs to illustrate the basic ideas of each topic with graphs		End of 2015	Administration and Members of The Examination Committee
Course Coordinator:	Associate Professor Dr. Mohsen S. Soliman & Assistance Professor Dr. Amro Abdel-Raouf
