

Annual Course Report

Program on which this course is given:	Diploma of Applications of Automatic Control of Mech. Power Systems
Department offering the program:	Mechanical Power Engineering Department - ACC control Lab
Department offering the course:	Mechanical Power Engineering Department - ACC control Lab
Academic Level:	Mandatory Course- 1 st Term of the Diploma of Graduate Studies
Date	1 st Term 2015/2016
Semester (based on final exam timing)	<input checked="" type="checkbox"/> Fall <input type="checkbox"/> Spring

A - Basic Information

1. Title:	Automatic Control - Theory and Applications in Mechanical Power Systems					Code:	MEP 561	
2. Units/Credit hrs per week:	Lectures	3 Credit hours per week	Tutorial	--	Practical	--	Total	3
3. Names of lecturers contributing to the delivery of the course:	• Associate Professor Dr. Mohsen S. Soliman & Assistance Professor Dr. Amro Abdel-Raouf							
4. Course coordinator:	Associate Professor Dr. Mohsen S. Soliman	External evaluator:	NA at this time					

B- Statistical Information (for 2015/2016)

جامعة القاهرة كلية الهندسة
دبلوم تطبيقات التحكم الأوتوماتيكي في نظم القوى (ملاحظة يتم ضم نتيجة امتحان الترم الصيفي 2014/2015 مع نتيجة الترم الأول 2015/2016)
نتيجة الفصل الدراسي الأول للعام الأكاديمي ٢٠١٦/٢٠١٥

C- Professional Information

1. Course Teaching:

• Topics actually taught	No. of hrs	Lecture	Tutorial/ Practical	Lecturer
<ul style="list-style-type: none"> - Introduction to Basics and definitions and terminologies associated with automatic control theory. - Various types of automatic control loops in mechanical power and energy transfer systems. - Essential requirements of accuracy, efficiency, safety, and stability of automatic control systems - Concepts of mathematical modelling of various mechanical power systems and energy transfer processes - The element and the whole system transfer functions, and Block diagram analysis method. - Laplace Transform & inverse Laplace technique to solve the system's ordinary time-dependent differential equations. - Instantaneous dynamic response of control system & its graphical presentation on an output-time scale for various types of different input testing functions. - Main definitions and control characteristics of dynamic response of 1st and 2nd order automatic control systems. - The analogy between various types of mechanical control systems and electric control systems. - Practical applications of automatic control theory in different mechanical power and heat and mass transfer equipments. 	36 hrs	3 hrs/ week for 12 weeks before the final term exam	---	Associate Professor Dr. Mohsen S. Soliman & Assistance Professor Dr. Amro Abdel-Raouf

• Topics taught as a percentage of the content specified:		<input type="checkbox"/> >90%	<input checked="" type="checkbox"/> 70-90%	<input type="checkbox"/> <70%					
• Reasons in detail for not teaching any topic:									
- Reducing the number of weeks/ Semester for many social and political reasons.									
- Many mandatory vacations as per requirements of the university management. The term is only 12 weeks.									
• If any topics were taught which are not specified, give reasons in detail: Non									
2. Teaching and Learning Methods:									
Lectures (√)	Practical/ Training ()	Seminar/ Workshop ()	Class Activity (√)	Case Study (√)	Projects ()	Laboratory ()	E-learning (√)	Assignments /Homework (√)	Other: Submitting reports
If teaching and learning methods were used other than those specified, list and give reasons: Non									
3. Student Assessment:									
• Method of Assessment		Percentage of total							
-All in-term works, sheets, and Reports		30%							
-Final-term formal, written Examination		70%							
-Total		100%							
• Members of Examination Committee:		Associate Professor Dr. Mohsen S. Soliman & Assistance Professor Dr. Amro Abdel-Raouf							
• Role of external evaluator:		Review program ILOs							
4. Facilities and Teaching Materials:		<input type="checkbox"/> Totally adequate <input checked="" type="checkbox"/> Adequate to some extent <input type="checkbox"/> Inadequate							
List any inadequacies:									
Classes are not totally suits the Multi-Media Facilities Classroom has no white screen for the data show and it needs more ventilation fans.									

5. Exams/ILOs Matrix

• ILOs/Evaluation Source Matrix

ILOs	Source of Evaluation									
	Assignments	Quizzes	Experiments	Lab Exam	Midterm Exam	Projects	Term Papers/ Reports	Final Exam	Others 1	Others 2
<ul style="list-style-type: none"> ❖ Knowledge and Understanding ❖ Intellectual Skills ❖ Professional and Practical Skills ❖ General and Transferable Skills 										
<p>10. Knowledge and Understanding: Having successfully completed this course, the post-graduate student should have knowledge and understanding of:</p> <p>a1- Basics and various definitions and terminologies associated with automatic control theory.</p> <p>A2- Various types of automatic control loops in mechanical power and energy transfer systems.</p> <p>A3- Essential requirements of accuracy, efficiency, safety, and stability of automatic control systems</p> <p>a4- Concepts of mathematical modelling of various mech. Power systems & energy transfer processes</p> <p>a5- The element and the whole system transfer functions, and Block diagram analysis method.</p> <p>A6- Laplace Transform & inverse Laplace technique to solve the system's ordinary time-dependent differential equations.</p> <p>A7- Instantaneous dynamic response of control system and its graphical presentation on an output-time scale for various types of different input testing functions.</p> <p>A8- Main definitions and control characteristics of dynamic response of 1st and 2nd order automatic control systems.</p> <p>A9- The analogy between various types of mechanical control systems and electric control systems.</p> <p>A10- Practical applications of automatic control theory in different mechanical power and heat transfer and mass transfer processes and equipments.</p>	√	√	-	-	-	-	√	√	-	-

b) Intellectual Skills:

Having successfully completed this course, the student should have the ability to do:

- b1- Select and apply appropriate mathematical and technical methods to model, analyze, and solve automatic control problems.
- B2- Search for scientific and technical information and adopt control self-learning capabilities of pressure, temperature, flow rate, flow velocity, and force ...etc.
- b3- Analyze and compare the performance and time response of different types of ordinary time-dependent differential eqns of control systems.
- B4- Solve numerical and practical examples on automatic control systems.
- B5- Apply scientific and engineering analysis for different mechanical power control systems.
- B6- Apply and use the Laplace Transform and the inverse Laplace tables for mathematical modeling, block diagram reduction and for solving the system's ordinary time-dependent differential equations.

√	√	-	-	-	-	√	√	-	-
---	---	---	---	---	---	---	---	---	---

c) Professional and Practical Skills:

Having successfully completed this course, the student should have the ability to do:

- c1- Identify several types of automatic control problems which are essential for design and operation of mechanical power systems and energy transfer processes.
- C2- Perform professional design and modelling for different automatic control systems.
- C3- Suggest possible alternative solutions for various types of automatic control systems.
- C4- Use and apply different tables and equations for Laplace and inverse Laplace Transformations.
- C5- Diagnose stability and dynamic response problems of automatic control of mechanical power systems and energy transfer equipments.
- C6- Formulate and analyze heat transfer and fluid flow practical problem related to control fields.

√	√	-	-	-	-	√	√	-	-
---	---	---	---	---	---	---	---	---	---

d) General and Transferable Skills:

Having successfully completed this course, the student should have the ability to do:

- d1- Perform engineering calculations, draw feed-back control circuits, block diagrams, graphical presentation of experimental data, and perform data-regression analysis.
- D2- Transfer knowledge, Work in group, & Communicate in written & oral forms, in English.
- D3- Use IT and evolutionary technological tools & PC applications (Excel, Mat lab, Virtual labs, .etc).
- d4- Prepare & write reports, Manipulate & sort data, Think logically, and continuous self-E-learning.
- D5- Identify practical problems, compare between different technologies for control systems.
- D6- Organise, manage time and resources effectively; for short-term and longer-term commitments.

√	√	-	-	-	-	√	√	-	-
---	---	---	---	---	---	---	---	---	---

- Midterm Exam: No Midterm Exam for graduate studies programs

Question	ILOs									
	1	2	3	4	5	6	7	8	9	10
1. (problem 1)										
2. (problem 2)										

- Final Exam:

Different parts of the ILOs are evaluated adequately through-out various part of the final exam

Question	ILOs									
	1	2	3	4	5	6	7	8	9	10
1. (problem 1)	√	√	√							
2. (problem 2)			√	√	√					
3. (problem 3)					√	√	√	√		
4. (problem 4)							√	√	√	√
5. (problem 5)								√	√	√

6. Administrative Constraints: Reducing the number of the weeks per semester

- List any difficulties encountered:

- Reducing the number of weeks/ Semester for many social and political reasons

- Many mandatory vacations as per requirements of the university management. The term is only 12 weeks.

7. Comments from external evaluator(s):	Response of Course Team	
Not available in writing for instructors to respond to	None	
8. Comments from Students:	Response of Course Team	
Done but not available in writing for instructors to respond to	None	
9. Course Enhancement:		
Progress on actions identified in the previous year's action plan:		
Action	State whether or not completed and give reasons for any non-completion	
Upgrading Teaching facilities Supply visual aids for the classrooms Maintenance of classrooms	Not completed due to administrative problems	
10. Action Plan for Academic Year 2016 – 2017		
Actions Required	Completion Date	Person Responsible
Upgrading Teaching facilities Supply visual aids Maintenance of classrooms Incorporate more practical materials & measurement experimental labs in the course Make a Mat lab programs to illustrate the basic ideas of each topic with graphs	End of 2017	Administration and Members of The Examination Committee
Course Coordinator:	Associate Professor Dr. Mohsen S. Soliman & Assistance Professor Dr. Amro Abdel-Raouf	
Signature:		

Date: February 2016
