

### Annual Course Report

Program on which this course is given:	Diploma of Applications of Automatic Control of Mech. Power Systems
Department offering the program:	Mechanical Power Engineering Department - ACC control Lab
Department offering the course:	Mechanical Power Engineering Department - ACC control Lab
Academic Level:	Mandatory Course- 2 <sup>nd</sup> Term of the Diploma of Graduate Studies
Date	2 <sup>nd</sup> Term 2014/2015
Semester (based on final exam timing)	<input type="checkbox"/> Fall <input checked="" type="checkbox"/> Spring

#### A - Basic Information

1. Title:	Using PLC and IT in Automatic Control Systems					Code:	MEP 564		
2. Units/Credit hrs per week:	Lectures	3 Credit hours per week	Tutorial	--	Practical	--	Total	3	
3. Names of lecturers contributing to the delivery of the course:	• Associate Professor Dr. Mohsen S. Soliman								
4. Course coordinator:	Associate Professor Dr. Mohsen S. Soliman	External evaluator:	NA at this time						

#### B- Statistical Information (for 2015/2016)

See the Next Table for all Grades and statistics for the last spring-term 2015/2016

### C- Professional Information

#### 1. Course Teaching:

• Topics actually taught	No. of hrs	Lecture	Tutorial/ Practical	Lecturer
Introduction- Define a PLC system- Differences between continuous control systems or conventional DCS and the contemporary discrete/digital control systems which are computer-based Programmable Logic controllers (PLCs). Types of PLCs- Identifying major and expansion components, functions and applications of industrial PLC system. Basics of electric components in PLC circuits(Sensors,transducers,keys, Relays, Contactors)- Basics and essentials of discrete control systems using common control systems. Types of Analog and Digital Signals-Pneumatic Logical Elements- Types of Memories: ROM, RAM, EPROM and EEPROM -Identify types and describe operation modes of timers & counters. PLC Programming-Read, understand and write types of basic ladder logic, statement list & Function Block diagrams. Identify operational and technical differences between various types PLC devices & models. Identify proper technical manual to refer to for PLC installation, programming & implementation. Expanding of PLCs-Selection &connection for proper expansion modules & various types of PLC analog inputs/outputs.	36 hrs	3 hrs/ week for 12 weeks before the final term exam	---	Associate Professor Dr. Mohsen S. Soliman
• Topics taught as a percentage of the content specified:	<input type="checkbox"/> >90%	<input checked="" type="checkbox"/> 70-90%	<input type="checkbox"/> <70%	
• Reasons in detail for not teaching any topic:				
- Reducing the number of weeks/ Semester for many social and political reasons				

- Many mandatory vacations as per requirements of the university management. The term is only 12 weeks.

- If any topics were taught which are not specified, give reasons in detail:

Non

### 2. Teaching and Learning Methods:

Lectures	Practical/ Training	Seminar/ Workshop	Class Activity	Case Study	Projects	Laboratory	E-learning	Assignments /Homework	Other: Submitting reports
(√)	( )	( )	(√)	(√)	( )	( )	(√)	(√)	

If teaching and learning methods were used other than those specified, list and give reasons: Non

### 3. Student Assessment:

- Method of Assessment

Percentage of total

-All in-term works, sheets, and Reports

30%

-Final-term formal, written Examination

70%

-Total

100%

- Members of Examination Committee:

Associate Professor Dr. Mohsen S. Soliman &  
Assistance Professor Dr. Amro Abdel-Raouf

- Role of external evaluator:

Review program ILOs

### 4. Facilities and Teaching Materials:

Totally adequate     Adequate to some extent     Inadequate

List any inadequacies:

Classes are not totally suits the Multi-Media Facilities

Classroom has no white screen for the data show and it needs more ventilation fans.

### 5. Exams/ILOs Matrix

- ILOs/Evaluation Source Matrix

ILOs	Source of Evaluation									
	Assignments	Quizzes	Experiments	Lab Exam	Midterm Exam	Projects	Term Papers/Reports	Final Exam	Others 1	Others 2
<ul style="list-style-type: none"> <li>❖ Knowledge and Understanding</li> <li>❖ Intellectual Skills</li> <li>❖ Professional and Practical Skills</li> <li>❖ General and Transferable Skills</li> </ul>										
<b>a) Knowledge and Understanding:</b> -Basics of process sequential control & examples of practical applications of industrial PLC Systems. -Major functions & various components & expansion modules of different types of PLC systems. -Types of PLC discrete or analog inputs/outputs signals and operation of PLC timers and counters. - Structure of PLC languages for the Ladder logic, statement list, and function block diagrams. -Basics of programming, running, simulation, diagnostics & troubleshooting of various PLCs.	√	√	-	-	-	-	√	√	-	-

<p><b>b) Intellectual Skills:</b>          -Select and apply appropriate technical and optimum method in doing engineering design and analysis of automatic control problems.          -Searching for the scientific and technical information and adopting PLC automatic control capabilities.          -Analyze and compare various PLC components, performance, and the technical specifications of different PLC systems.          -Apply the concept of Ladder logic simulation, PLC diagnostics and the operation of PLC systems.          -Compare between practical measurement devices, transducers &amp; methods for signal conditioning, data acquisition and different output displaying /processing systems of PLC systems.          -Solve practical examples on using PLCs for automatic control problems.          -Study, describe and compare between different PLC types, models and programming languishes.</p>	√	√	-	-	-	-	√	√	-	-
<p><b>c) Professional and Practical Skills:</b>          -Identify various types of field devices (sensors, actuators and final control elements) which are essential for PLC automatic control systems.          -Suggest possible alternative sensors, actuators &amp; final control elements for PLC systems.          -Diagnose operation modes, configuration &amp; diagnostics of PLC systems.          - Design, select, apply and implement various examples of PLC automatic control systems.          - Diagnose failure and automatic control problems of industrial PLC automatic control systems.          - Monitor &amp; evaluate performance of different parts &amp; components of PLC control systems.          - Formulate &amp; analyze heat transfer, energy and flow problems related to PLC control systems.</p>	√	√	-	-	-	-	√	√	-	-
<p><b>d) General and Transferable Skills:</b>          -Transfer knowledge, Work in group, and Communicate in written &amp; oral forms, in English.          - Use IT&amp; evolutionary technological tools &amp; PC applications (Excel, Mat lab, Virtual labs, .etc).          -Prepare, write technical reports, Manipulate, sort data, Think logically, and continuous self-E-learning.          - Identify practical problems; compare between different technologies for PLC control systems.          -Organise &amp; manage time &amp; resources effectively; for short-term and longer-term commitments.</p>	√	√	-	-	-	-	√	√	-	-

- **Midterm Exam: No Midterm Exam for graduate studies programs**

Question	ILOs									
	1	2	3	4	5	6	7	8	9	10
1. (problem 1)										
2. (problem 2)										

- **Final Exam:**

Different parts of the ILOs are evaluated adequately through-out various part of the final exam

Question	ILOs									
	1	2	3	4	5	6	7	8	9	10
1. (problem 1)	√	√	√							

2. (problem 2)			√	√	√					
3. (problem 3)					√	√	√	√		
4. (problem 4)							√	√	√	√
5. (problem 5)								√	√	√

<b>6. Administrative Constraints: Reducing the number of the weeks per semester</b>		
<ul style="list-style-type: none"> <li>List any difficulties encountered:</li> <li>- Reducing the number of weeks/ Semester for many social and political reasons</li> <li>- Many mandatory vacations as per requirements of the university management. The term is only 12 weeks.</li> </ul>		
<b>7. Comments from external evaluator(s):</b>	<b>Response of Course Team</b>	
Not available in writing for instructors to respond to	None	
<b>8. Comments from Students:</b>	<b>Response of Course Team</b>	
Done but not available in writing for instructors to respond to	None	
<b>9. Course Enhancement:</b>		
<b>Progress on actions identified in the previous year's action plan:</b>		
<b>Action</b>	<b>State whether or not completed and give reasons for any non-completion</b>	
Upgrading Teaching facilities Supply visual aids for the classrooms Maintenance of classrooms	Not completed due to administrative problems	
<b>10. Action Plan for Academic Year 2016 – 2017</b>		
<b>Actions Required</b>	<b>Completion Date</b>	<b>Person Responsible</b>
Upgrading Teaching facilities Supply visual aids Maintenance of classrooms Incorporate more practical materials & measurement experimental labs in the course Make a Mat lab programs to illustrate the basic ideas of each topic with graphs	End of 2017	Administration and Members of The Examination Committee
<b>Course Coordinator:</b>	Associate Professor Dr. Mohsen S. Soliman	
<b>Signature:</b>		

Date: August 2016
