

Annual Course Report

Program on which this course is given:	Diploma of Applications of Automatic Control of Mech. Power Systems
Department offering the program:	Mechanical Power Engineering Department - ACC control Lab
Department offering the course:	Mechanical Power Engineering Department - ACC control Lab
Academic Level:	Elective Course- 1 st or 2 nd Term of the Diploma of Graduate Studies
Date	2 nd Term 2015/2016
Semester (based on final exam timing)	Fall √ Spring

A - Basic Information

1. Title:	Applications of Virtual Labs for Control of HVAC-Central Air-Conditioning Systems					Code:	MEP 571	
2. Units/Credit hrs per week:	Lectures	3 Credit hours per week	Tutorial	--	Practical	--	Total	3
3. Names of lecturers contributing to the delivery of the course: Associate Professor Dr. Mohsen S. Soliman & Assistance Professor Dr. Amro Abdel-Raouf								
4. Course coordinator:		Associate Professor Dr. Mohsen S. Soliman			External evaluator:		NA at this time	

B-Statistical Information (for 2015/2016)

C- Professional Information

1. Course Teaching:

• Topics actually taught	No. of hrs	Lecture	Tutorial/ Practical	Lecturer
<p>-Introduction: Review of various definitions, basics, and conservation equations of different types of HVAC processes.</p> <p>-HVAC case study: Investigation of interactive virtual lab & computer-based practical training that includes simulation and flow visualization. It provides the participants a broad-based understanding of the most important concepts of practical automatic control & real thermo-fluid processes existing in an industrial HVAC plant used to air-condition a building to some pre-specified dry-bulb temperature and relative humidity. Air-locks are used to have different adjustable ratios of recycled air brought back to the building mixed with some renewal air. The plant includes 4 centrifugal pumps for the 4 battery cells for heating, cooling, humidification, and after-heating. Each pump has its on/off control board. Each battery cell has a control board that includes a pump flow rate-meter and both inlet and outlet cell temperature (except the humidification cell). The plant has an on/off air fans or ventilators control board and air locks control board. On-line, real psychometric diagram is plotted showing all performed processes. The diagram shows a point for Renewal air, point for Recycled air taken from inside the environment, a point for the mixture of Renewal and Recycled air, points for the air outlet from the various A/C plant batteries, and last point for the air going to the environment-building. The simulation includes many flow control valves and temperature read-out gauges. , many critical control alarms, input/output signals, operation and instrumentation parameter-boards, diagnostic tools, error-report filling tool, help and trouble-shooting and Thermal Balance Calculations and Plotting tools.</p>	36 hrs	3 hrs/ week for 12 weeks before the final term exam	---	Associate Professor Dr. Mohsen S. Soliman & Assistance Professor Dr. Amro Abdel-Raouf

• Topics taught as a percentage of the content specified:

>90% 70-90% <70%

• Reasons in detail for not teaching any topic:

- Reducing the number of weeks/ Semester for many social and political reasons.

- Many mandatory vacations as per requirements of the university management. The term is only 12 weeks.

• If any topics were taught which are not specified, give reasons in detail: Non

2. Teaching and Learning Methods:

Lectures	Practical/ Training	Seminar/ Workshop	Class Activity	Case Study	Projects	Laboratory	E-learning	Assignments /Homework	Other: Submitting reports
(√)	()	()	(√)	(√)	()	()	(√)	(√)	

If teaching and learning methods were used other than those specified, list and give reasons: Non

3. Student Assessment:

• Method of Assessment

Percentage of total

-All in-term works, sheets, and Reports

30%

-Final-term formal, written Examination

70%

-Total

100%

• Members of Examination Committee:

Associate Professor Dr. Mohsen S. Soliman & Assistance Professor Dr. Amro Abdel-Raouf

• Role of external evaluator:

Review program ILOs

4. Facilities and Teaching Materials:

Totally adequate Adequate to some extent Inadequate

List any inadequacies:

Classes are not totally suits the Multi-Media Facilities

Classroom has no white screen for the data show and it needs more ventilation fans.

5. Exams/ILOs Matrix

• ILOs/Evaluation Source Matrix

	Source of Evaluation

ILOs	Assignments	Quizzes	Experiments	Lab Exam	Midterm Exam	Projects	Term Papers/Reports	Final Exam	Others 1	Others 2
<ul style="list-style-type: none"> ❖ Knowledge and Understanding ❖ Intellectual Skills ❖ Professional and Practical Skills ❖ General and Transferable Skills 										
<p>a) Knowledge and Understanding: Having successfully completed this course, the post-graduate student should have knowledge and understanding of:</p> <p>a1- Basics, various definitions & terminologies associated with HVAC processes and control systems.</p> <p>a2- Requirements of general interactive virtual lab program to study & analyze HVAC control systems.</p> <p>a3- Basics of on-line interactive virtual lab to study and analyze HVAC control circuits/systems.</p> <p>a4- Essential components of HVAC circuits as important application of mechanical power systems.</p> <p>a5- Basics and main concepts of HVAC processes, functions and how to perform them, and what their inputs and outputs signals are?</p> <p>a6- Governing conservation eqns of HVAC automatic control processes.</p> <p>a7- Analysis of industrial HVAC automatic control systems by using modern PC-based Virtual lab program to simulate actual processes performed in real HVAC automatic control systems.</p> <p>a8- Main requirements of on-line chart plotting module for real psychrometric diagram plotting to show all performed HVAC processes.</p> <p>a9- Structure, main components, various menus & submenus of HVAC automatic control Virtual lab.</p> <p>a10- Control parameters, Synoptic diagram, flow paths, instrumentation & control boards of HVAC Virtual Lab.</p> <p>a11- Verification and engineering calibration of the outputs of a HVAC automatic control virtual lab program.</p>	√	√	-	-	-	-	√	√	-	-
<p>b) Intellectual Skills: Having successfully completed this course, the student should have the ability to do:</p> <p>b1- Searching for scientific information and adopting automatic control self-E-learning capabilities.</p> <p>b2- Analyze and compare the component effects, performance, and efficiency of different types of automatic control HVAC systems.</p> <p>b3- Apply the concept of software simulation of diagnostics & operation of various types of practical HVAC systems.</p> <p>b4- Compare between various types of HVAC processes, components, and complete systems.</p> <p>b5- Select and apply appropriate HVAC processes, components to design, model, analyze, and solve automatic HVAC control problems.</p> <p>b6- Apply scientific and engineering analysis for HVAC circuits/systems.</p> <p>b7- Select and apply appropriate technical and optimum method in doing engineering design and analysis of automatic control problems.</p>	√	√	-	-	-	-	√	√	-	-

c) Professional and Practical Skills:											
Having successfully completed this course, the student should have the ability to do:											
c1- Identify several types of automatic HVAC control problems which are essential for design and operation of mechanical power systems and energy transfer processes.											
c2- Perform professional design and modelling for different automatic HVAC control systems.		√	√	-	-	-	-	√	√	-	-
c3- Suggest possible alternative solutions for various types of HVAC components and parts.											
c4- Diagnose efficiency and performance of different types of HVAC control circuits/systems.											
c5- Analyze different types of HVAC processes on real psychrometric diagram/plotting schematics.											
d) General and Transferable Skills:											
Having successfully completed this course, the student should have the ability to do:											
d1- Perform engineering assembly of many different HVAC processes and components in one control system.											
d2- Transfer knowledge, Work in group, and Communicate in written & oral forms, in English.											
d3- Use IT and evolutionary technological tools & PC applications (Excel, Mat lab, Virtual labs, .etc).		√	√	-	-	-	-	√	√	-	-
d4- Prepare & write reports, Manipulate & sort data, Think logically, and continuous self-E-learning.											
d5- Identify practical problems, compare between different technologies for HVAC systems.											
d6- Organise and manage time & resources effectively; for short-term and longer-term commitments											

- **Midterm Exam: No Midterm Exam for graduate studies programs**

Question	ILOs									
	1	2	3	4	5	6	7	8	9	10
1. (problem 1)	x	x	x	x	x	x	x	x	x	x
2. (problem 2)	x	x	x	x	x	x	x	x	x	x

- **Final Exam:**

Different parts of the ILOs are evaluated adequately through-out various part of the final exam

Question	ILOs									
	1	2	3	4	5	6	7	8	9	10
1. (problem 1)	√	√	√							
2. (problem 2)			√	√	√					
3. (problem 3)					√	√	√	√		
4. (problem 4)							√	√	√	√
5. (problem 5)								√	√	√

6. Administrative Constraints: Reducing the number of the weeks per semester

- List any difficulties encountered:
 - Reducing the number of weeks/ Semester for many social and political reasons
 - Many mandatory vacations as per requirements of the university management. The term is only 12 weeks.

7. Comments from external evaluator(s):	Response of Course Team	
Not available in writing for instructors to respond to	None	
8. Comments from Students:	Response of Course Team	
Done but not available in writing for instructors to respond to	None	
9. Course Enhancement:		
Progress on actions identified in the previous year's action plan:		
Action	State whether or not completed and give reasons for any non-completion	
Upgrading Teaching facilities Supply visual aids for the classrooms Maintenance of classrooms	Not completed due to administrative problems	
10. Action Plan for Academic Year 2016 – 2017		
Actions Required	Completion Date	Person Responsible
Upgrading Teaching facilities Supply visual aids Maintenance of classrooms Incorporate more practical materials & measurement experimental labs in the course Make a Mat lab programs to illustrate the basic ideas of each topic with graphs	End of 2017	Administration and Members of The Examination Committee
Course Coordinator:	Associate Professor Dr. Mohsen S. Soliman
